

Hey all, I'm **RAVI KUMAR DUSI!**

MASTERS in Electronics
Engineering

I finished my Masters in Electronics Engineering with microsystems as my specialization. Good in PCB design, Electronics, circuits , testing , prototyping & more!. Fitness enthusiastic and movie buff.

What I'm good at- in a glance

Circuit Design

Simulation & LAB Testing

Standards Knowledge

Analytical &
communication skills

Software Tools

Altium-PCB

Ltspice

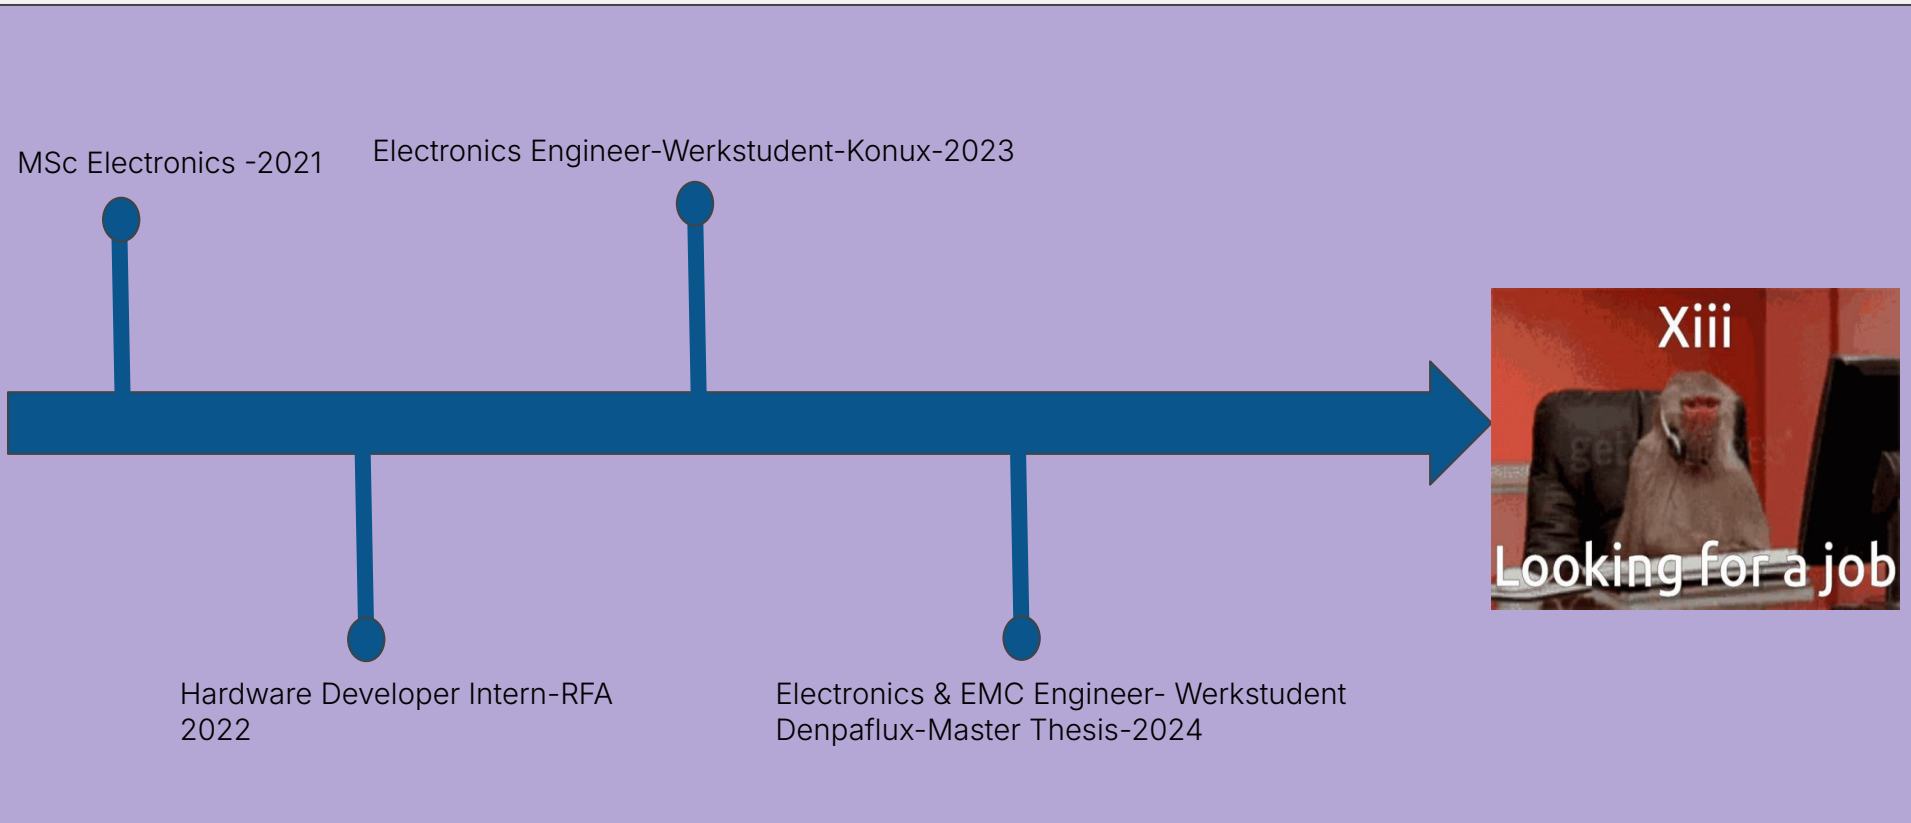

Soldering

Documenta
tion

Debugging

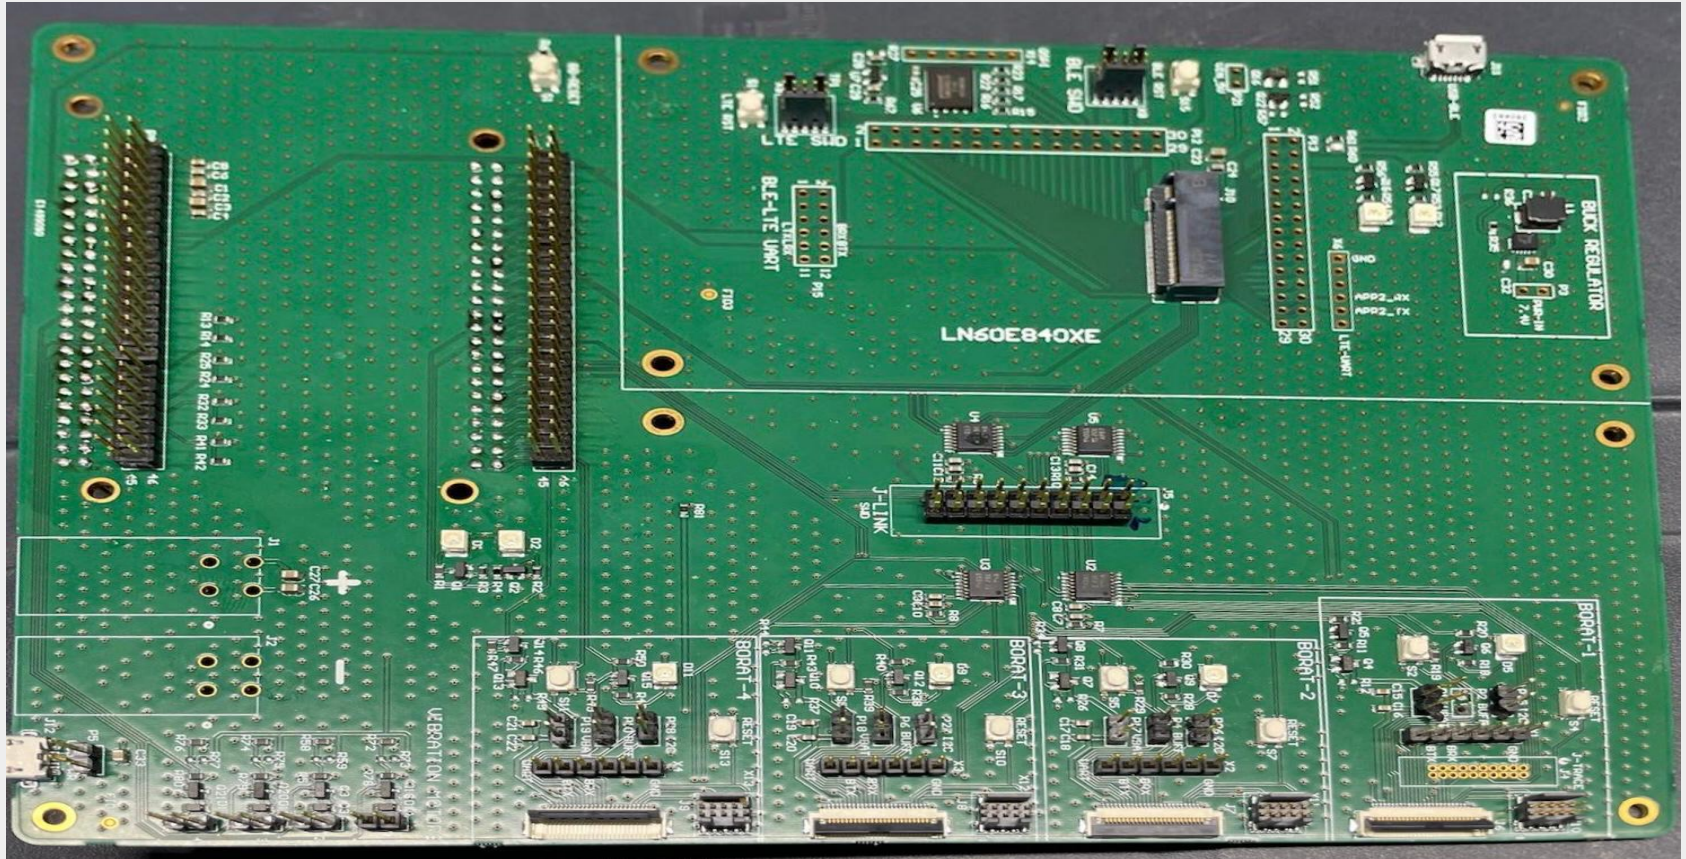

EMC &
Safety
Standards

Work Experience

Designed a Test PCB-ITB:

Designed a test PCB for validation team to perform different tasks.

The background of the slide is a photograph of the Hochschule Bremen building, a large red brick structure with many windows and a central arched entrance. The text is overlaid on this image in a semi-transparent blue font.

Hochschule Bremen

1. M.Sc Electronics (Microsystems Engineering)

Place of study- Bremen

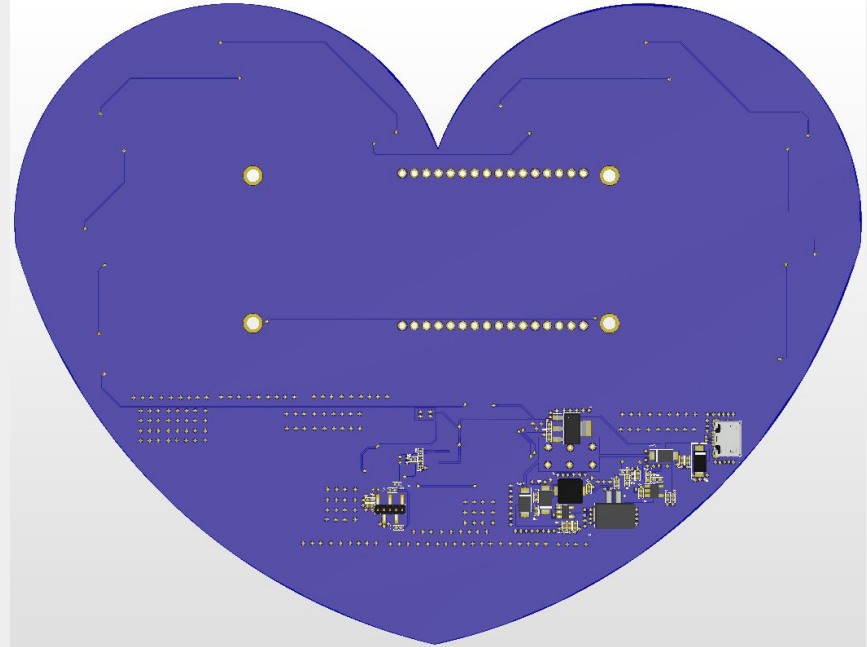

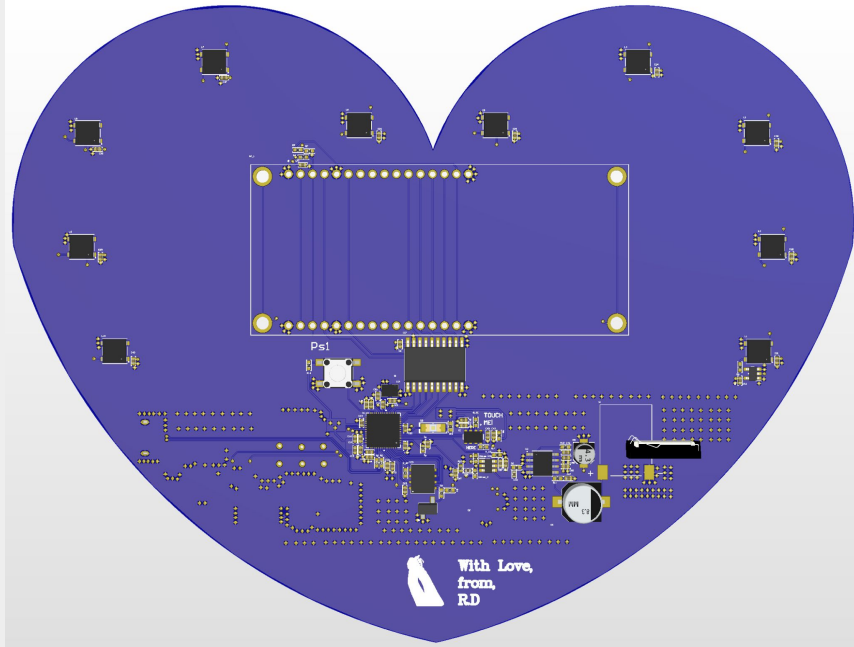

Relevant Subjects-

Material Science, Analog mixed signal circuit design; Concept Engineering for mixed technological systems; **Microtechnology and Microstructuring**; Computer Aided Data Acquisition ;Electronics Engineering Project.

Master Thesis: Best Practices in Electronics Design, Unveil the myths of common practices.

Watching
movies/series

What you want to achieve. What you want to be.

I want to be an electronics engineer. Contribute to electronics, i want to feel proud of myself by building or help to build products with the knowledge i possess. Constant learning is my life goal.

Apart from it, enjoying life until it ends is the primary goal!

***DANKE FÜR IHRE
AUFMERKSAMKEIT!***
